Caravan & Motorhome Regulator

The new range of caravan and motor-home regulators from Reca provide the most compact, high specification solution to gas control and incorporate all of the latest safety features.

All of our regulators have a universal M20 inlet and are available with 8MM or 10MM outlet. They are fully interchangeable with other regulators on the market making them ideal for retro-fitting.

Our range includes a unique 90deg configuration regulator ideal where space is at a premium, and also the most compact 30mbar automatic changeover unit available on the market today. All of our regulators have built in test point to enable leak testing of your system.

EN 12864 In order to allow the same regulator to be used throughout Europe regardless of gas type, EN 12864 standard established a common working pressure of 30mbar. All new caravans and motorhomes manufactured since 2004 will be fitted with a regulator conforming to this standard. Our regulators conform fully to this standard and incorporate all available safety devices.

In addition all of our regulators carry a 5 YEAR WARRANTY
